SUMMARY

Passionate electrical engineer with 2 years of experience, transitioned to front-end development to pursue a deep interest in web technologies. Skilled in MERN stack development to ensure a comprehensive understanding of application architecture, enabling the creation of efficient and maintainable front-end code. Since November 2023, dedicated to learning and applying new technologies, with over 6 months of project experience in front-end development using React. Aiming to master React, React Native, Next.js, and Angular to excel as a frontend developer. Seeking a role that leverages my enthusiasm for continuous learning and expertise in modern web development frameworks.
